REMOVAL OF DEPOSITS FROM COPYRIGHT OFFICE

NOTICE is given to authors, copyright proprietors and other lawful claimants that they may claim and remove before January 1, 1956, any article of the following named classes of published works deposited for copyright between January 1, 1952, and January 1, 1953, not reserved or disposed of as provided by sections 213 and 214 of Title 17 of the United States Code and still remaining in the files of the Copyright Office at the time of the request for their removal. The classes of published works covered by this notice are:

Books and Pamphlets.
Contributions to periodicals.
Works of art; models or designs for works of art.
Reproductions of a work of art.
Drawings or plastic works of a scientific or technical character.
Photographs.
Prints and pictorial illustrations excluding prints or labels used for articles of merchandise.

Other published works and all unpublished works are excluded from this notice.

The request for the removal of any copyright deposit should be signed by the person entitled thereto or his duly authorized agent. Such request should identify the work by stating the title, author, copyright proprietor, registration number and year of deposit, and should be addressed to the Copyright Office, Library of Congress, Washington 25, D. C.

L. C. card, 6–35347

This number identifies the Library of Congress printed card for the complete series of the Catalog of Copyright Entries.

For sale by the Register of Copyrights, Library of Congress, Washington 25, D. C. Price for this part: $1.00 per issue, $2.00 per year.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided to represent the classes of material listed in section 5 of said Title 17. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to distinguish the classes, and the prices of the semiannual issues. The annual subscription for each part is twice the price of a single issue and the complete catalog, including all parts, may be secured on a subscription basis for $20 a year.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, as given in the application for registration, the copyright date, the copyright registration number, etc.) Available information in the records of the Copyright Office, including information relating to subsequent changes of ownership, can be obtained upon request and upon payment to the Register of Copyrights of the fee specified in section 215 of said Title 17 ($3 for each hour of time consumed) for the conduct of a search of the records.

In the case of each registration listed, except for renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of said Title 17, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) (3) of the regulations of the Copyright Office published in the *Code of Federal Regulations*, 1949 edition, which provides for the deposit of identifying reproductions in lieu of the work itself. Foreign works, two copies of which were deposited with a catalog card and application for registration under the waiver-of-fee provision in section 215 of Title 17 of the *United States Code*, are indicated by a zero immediately following the alphabetical symbol in the registration number.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Register of Copyrights.

The Copyright Office welcomes inquiries, suggestions and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

Table of Organization

Each part listed in the table records all current registrations in the class or classes indicated by the alphabetical symbols given. In each case the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis. A zero immediately following the symbol (e. g., AF0, EF0) distinguishes a foreign work deposited under the waiver-of-fee provision. The symbol R does not represent a class designated by the copyright law, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. These are recorded in a separate section of those parts of the *Catalog* which cover the classes in which the works were originally registered with the exception of music. Some parts also contain registrations made under other symbols if the subject matter or type of material is similar to that generally included in the part.

Selected Books in Art and Photography 147

INTRODUCTION

IN PARTS 7–11A are listed domestic and foreign works, currently registered in Classes G, H, I, J, and K, with the exception of commercial prints and labels registered in Class K under the symbol KK (which are listed in Part 11B). Renewal registrations of the above materials are also listed. Included in a special section are selected books in the fields of art and photography registered in Class A.

The works listed include original paintings, drawings, designs for works of art, three-dimensional works of art, charts, architectural and engineering plans and mechanical drawings, anatomical models and other plastic works, photographic prints, filmstrips, slide films, stereoscopic and other transparencies, published reproductions of existing works of art in the same or a different medium, and published prints and pictorial illustrations, including picture postcards, greeting cards, cartoons, and prints used for calendars, posters, etc. The selected books registered in Class A consist largely or primarily of illustrations, list or describe photographs or works of art (including those devoted to the works of individual artists or photographers), or are catalogs of exhibitions, etc.

Three sections make up Parts 7–11A. The first is an alphabetical list of currently registered works, usually entered under the name of the person or body principally responsible for the content of the work (author, artist, draftsman, photographer, etc.). The name of the employer is used in the case of a work made for hire, and the title in the case of filmstrips, comic strips, and certain other works. Each work is described in a main entry which includes also information pertinent to the claim of copyright. Interfiled with these entries are references to them from the names of joint authors, producing and releasing agents, and other essential names included in the main entries, and from distinctive titles, subjects of portraits, cities, geographic areas, and other scenes represented in the entries, when applicable. In the case of filmstrips, the references cover, in addition, the names of the authors and titles of published literary works upon which the filmstrips are based or with which they are correlated. Cross-references from variant forms of names are also included. The second section is a list of renewal registrations similar to the first. References in this section are from the names of renewal claimants and joint authors, and from titles. The list of selected books constitutes the third section and contains no references.

Each main entry for works currently registered, other than filmstrips, includes, in addition to the name or title under which it is filed, the following items of information as available and applicable:

1) Title.
2) Series title, if it appears in the application preceding the title of the work or if it is necessary to distinguish between two works of the same title.
3) Names of other persons contributing to the work.
4) Description of the pictorial content of the work.
5) Name of the publisher if this is different from the name under which the entry is filed and from the name of the claimant.
6) A brief description of the physical nature of the work.
7) Names of authors given in the application which do not appear elsewhere in the entry.
8) Name of the employer in the case of a work for hire, if so named in the application, together with the names of the employees.
9) Information contained in the application which relates to the registration of an earlier version of the work.
10) A brief statement of the new matter on which copyright is claimed when this information is given in the application, if not already shown in the entry, preceded by the abbreviation "NM."
11) Copyright symbol ©.
12) Name of the copyright claimant.
13) For published works, date of publication as given in the application; for unpublished works the date on which the last of all the items required to complete registration (i. e., each of the following: copy, application, and fee) was received in the Copyright Office.
14) The phrase "photo dep.," or "photos dep.," when photographs of three-dimensional works of art are accepted in lieu of copies.
15) Registration number.

Whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given in the work; e. g., © John Doe; 10Jan54 (in notice: 1953); K6219.

For currently registered filmstrips, the main entry includes, in addition to the title under which it is filed and items 7–13 and 15, enumerated above, the following items as available and applicable:

1) Production statement.
2) Physical description, including number of frames, width of film, etc.
3) Series title.
4) Author and title of the published literary work upon which the film is based or with which it is correlated.

For renewal registrations, the main entry includes, in addition to the name or title under which it is filed, the following items of information as available and applicable:

1) Title.
2) Description of the pictorial content of the work.
3) Copyright symbol ©.
4) Date of original copyright.
5) Original registration number.
6) Name of renewal claimant followed by a statement in parentheses usually in abbreviated form, giving the basis of the renewal claim as supplied by the claimant; e. g., "John Doe (NK)" indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
7) Date of receipt of the renewal application.
8) Renewal registration number.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided to represent the classes of material listed in section 5 of said Title 17. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to distinguish the classes, and the prices of the semiannual issues. The annual subscription for each part is twice the price of a single issue and the complete catalog, including all parts, may be secured on a subscription basis for $20 a year.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, as given in the application for registration, the copyright date, the copyright registration number, etc.) Available information in the records of the Copyright Office, including information relating to subsequent changes of ownership, can be obtained upon request and upon payment to the Register of Copyrights of the fee specified in section 215 of said Title 17 ($3 for each hour of time consumed) for the conduct of a search of the records.

In the case of each registration listed, except for renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of said Title 17, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) (3) of the regulations of the Copyright Office published in the *Code of Federal Regulations*, 1949 edition, which provides for the deposit of identifying reproductions in lieu of the work itself. Foreign works, two copies of which were deposited with a catalog card and application for registration under the waiver-of-fee provision in section 215 of Title 17 of the *United States Code*, are indicated by a zero immediately following the alphabetical symbol in the registration number.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Register of Copyrights.

The Copyright Office welcomes inquiries, suggestions and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

Table of Organization

Each part listed in the table records all current registrations in the class or classes indicated by the alphabetical symbols given. In each case the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis. A zero immediately following the symbol (e. g., AF0, EF0) distinguishes a foreign work deposited under the waiver-of-fee provision. The symbol R does not represent a class designated by the copyright law, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. These are recorded in a separate section of those parts of the *Catalog* which cover the classes in which the works were originally registered with the exception of music. Some parts also contain registrations made under other symbols if the subject matter or type of material is similar to that generally included in the part.

INTRODUCTION

IN PARTS 7–11A are listed domestic and foreign works, currently registered in Classes G, H, I, J, and K, with the exception of commercial prints and labels registered in Class K under the symbol KK (which are listed in Part 11B). Renewal registrations of the above materials are also listed. Included in a special section are selected books in the fields of art and photography registered in Class A.

The works listed include original paintings, drawings, designs for works of art, three-dimensional works of art, charts, architectural and engineering plans and mechanical drawings, anatomical models and other plastic works, photographic prints, filmstrips, slide films, stereoscopic and other transparencies, published reproductions of existing works of art in the same or a different medium, and published prints and pictorial illustrations, including picture postcards, greeting cards, cartoons, and prints used for calendars, posters, etc. The selected books registered in Class A consist largely or primarily of illustrations, list or describe photographs or works of art (including those devoted to the works of individual artists or photographers), or are catalogs of exhibitions, etc.

Three sections make up Parts 7–11A. The first is an alphabetical list of currently registered works, usually entered under the name of the person or body principally responsible for the content of the work (author, artist, draftsman, photographer, etc.). The name of the employer is used in the case of a work made for hire, and the title in the case of filmstrips, comic strips, and certain other works. Each work is described in a main entry which includes also information pertinent to the claim of copyright. Interfiled with these entries are references to them from the names of joint authors, producing and releasing agents, and other essential names included in the main entries, and from distinctive titles, subjects of portraits, cities, geographic areas, and other scenes represented in the entries, when applicable. In the case of filmstrips, the references cover, in addition, the names of the authors and titles of published literary works upon which the filmstrips are based or with which they are correlated. Cross-references from variant forms of names are also included. The second section is a list of renewal registrations similar to the first. References in this section are from the names of renewal claimants and joint authors, and from titles. The list of selected books constitutes the third section and contains no references.

Each main entry for works currently registered, other than filmstrips, includes, in addition to the name or title under which it is filed, the following items of information as available and applicable:

1) Title.
2) Series title, if it appears in the application preceding the title of the work or if it is necessary to distinguish between two works of the same title.
3) Names of other persons contributing to the work.
4) Description of the pictorial content of the work.
5) Name of the publisher if this is different from the name under which the entry is filed and from the name of the claimant.
6) A brief description of the physical nature of the work.
7) Names of authors given in the application which do not appear elsewhere in the entry.
8) Name of the employer in the case of a work for hire, if so named in the application, together with the names of the employees.
9) Information contained in the application which relates to the registration of an earlier version of the work.
10) A brief statement of the new matter on which copyright is claimed when this information is given in the application, if not already shown in the entry, preceded by the abbreviation "NM."
11) Copyright symbol ©.
12) Name of the copyright claimant.
13) For published works, date of publication as given in the application; for unpublished works the date on which the last of all the items required to complete registration (i. e., each of the following: copy, application, and fee) was received in the Copyright Office.
14) The phase "photo dep.," or "photos dep.," when photographs of three-dimensional works of art are accepted in lieu of copies.
15) Registration number.

Whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given in the work; e. g., © John Doe; 10Jan54 (in notice: 1953); K6219.

For currently registered filmstrips, the main entry includes, in addition to the title under which it is filed and items 7–13 and 15, enumerated above, the following items as available and applicable:

1) Production statement.
2) Physical description, including number of frames, width of film, etc.
3) Series title.
4) Author and title of the published literary work upon which the film is based or with which it is correlated.

For renewal registrations, the main entry includes, in addition to the name or title under which it is filed, the following items of information as available and applicable:

1) Title.
2) Description of the pictorial content of the work.
3) Copyright symbol ©.
4) Date of original copyright.
5) Original registration number.
6) Name of renewal claimant followed by a statement in parentheses usually in abbreviated form, giving the basis of the renewal claim as supplied by the claimant; e. g., "John Doe (NK)" indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
7) Date of receipt of the renewal application.
8) Renewal registration number.
